

Four reasons for easy load handling:

We make bulky goods easy to move

Transport heavy loads in a safe, easy and compact way with our TrolleyMover 4W 15, which is designed for the loading and unloading of B- and E-Frames with trolleys.

Space-saving transport of long goods via a 4-way function

- The standard driving mode allows forward and backwards movement over long distances
- Can be easily moved in every direction even in tight spaces due to the 4-way driving mode

Safe transport of heavy loads

- Designed for loads up to 1,500 kg
- Transport of long goods along the direction of travel

Space-saving turning

- Turn by 360° with standard driving mode
- Turning happens on the spot

Safe operation thanks to automatic functions

- Automatic opening and closing of trolley protection for LiftRunner B- and E-Frames
- Safe loading and unloading of B- and E-Frames with trolleys

Maximum manoeuvrability, ergonomics and durability due to the unique tiller

Automatic opening and locking function for trolley protection with the B- and E-Frames

Easy loading and unloading of an E-Frame with STILL standard trolleys

Factors for your success

Heavy made easy:

Transport heavy loads up to 1,500 kg in a safe, easy and compact way with our TrolleyMover 4W 15.

The TrolleyMover 4W 15 has been developed for the loading and unloading of LiftRunner B- and E-Frames with standard version STILL trolleys with diagonally arranged rollers with a rotating brake pedal.

Efficiency that saves space:

The TrolleyMover 4W 15 shines when things get tight. Thanks to the adjustable driving modes it can turn by 360° on the spot and makes the quick loading and unloading of the tugging train possible, even in tight spaces.

Flexible driving:

Flexibility due to two driving modes is its trump card. In standard driving mode the TrolleyMover 4W 15 only moves forwards and backwards – ideal if you have to cover long distances.

With the 4-way driving mode the TrolleyMover 4W 15 can be flexibly moved in any direction. This ensures that long goods can be transported along the direction of travel. An automatic opening and locking function for securing trolleys with LiftRunner B- and E-Frames keeps people and materials safe.
